A highly motivated and dedicated professional with a passion for web development. With a solid foundation in ASP.NET core and a commitment to continuous learning, I'm well-equipped to contribute to the success of any development team.

My Knowledge lies in designing and building web applications using the latest technologies and best practices. I have a strong understanding of the ASP.NET Core framework, MVC architecture, and **Restful** API development. I am good in programming languages such as **C# and JavaScript** and have experience working with front-end Technologies like Bootstrap and jQuery
